

CHIMPIPI LLC · PRODUCT

School Locator

Find My School for California districts
that want mobile-first clarity —
not enterprise GIS overhead.

Address → assigned school in seconds

chimpipi.com · hello@chimpipi.com

Sample: Hueneme Elementary SD demo on Vercel

Parents type an address. You stop fielding the same call.

Mid-size California districts still ask families to call the office to learn which elementary or junior high they attend. Enterprise tools exist — GuideK12, SchoolSite, PowerSchool PEA — but many districts just need a clean Find My School page: fast, mobile, bilingual-ready, embeddable, and honest about boundaries.

Address lookup

Autocomplete + map tap. Elementary and secondary results where the district structure requires it.

District branding

Your logo, colors, domain or embed snippet. Looks like part of your site — not a third-party widget from 2012.

Boundary care

Import certified GeoJSON / GIS exports. Annual update hours included. Clear outside-district messaging.

Ship in weeks

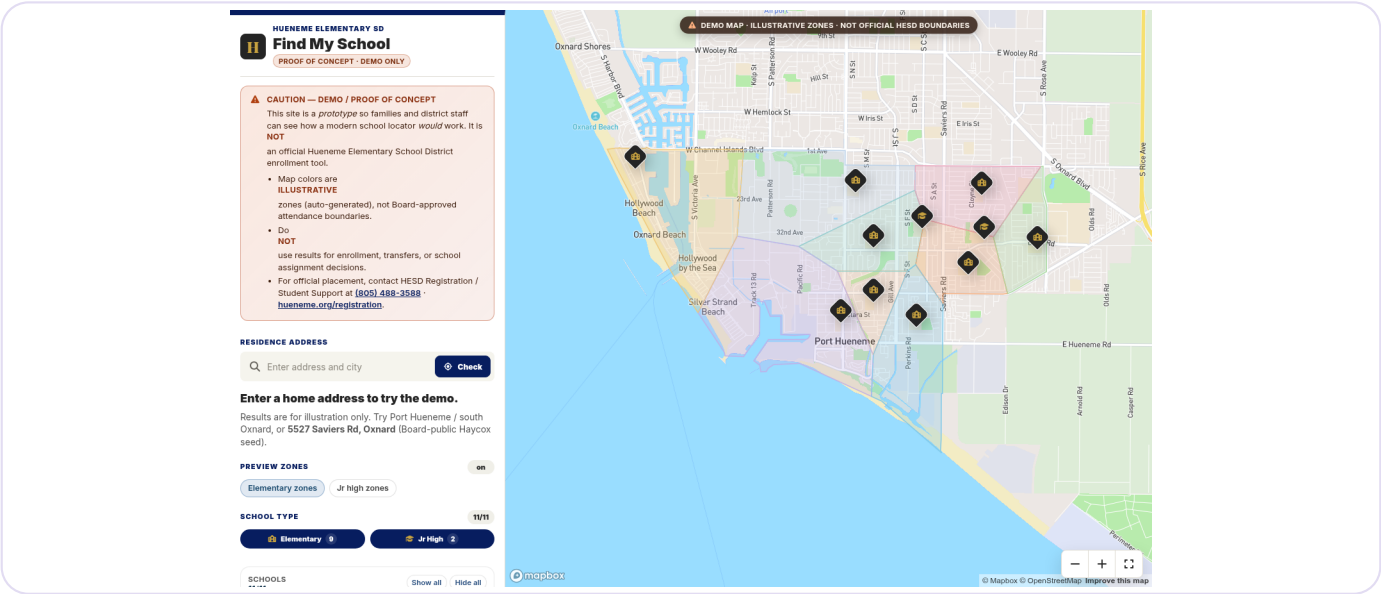

Fixed-scope pilot. No six-month discovery for a product that should take a parent fifteen seconds.

Positioning in one sentence

SchoolSite / GuideK12 for districts that just need a clean mobile Find My School page — live in weeks, not a GIS project.

Hueneme Elementary — live sample

We built a private proof of concept for Hueneme Elementary School District: 11 schools, CDE outer boundary, school directory, and a modern Mapbox interface. Deployed privately on Vercel. The demo shows exactly how Chimpipi ships — product-quality UX first, official data when the district is ready.

Built by a real California LLC

Chimpipi LLC is a legitimate business — not a side project in a drawer. We modernize websites for local businesses and ship focused district software. Portfolio: 12 live industry sites (from Port Hueneme Animal Hospital to Ventura Fight & Fitness). School Locator is productized: one codebase, white-label per district, annual care.

Typical year-one investment

Setup (boundaries, brand, embed, training)	\$2,500 – \$7,500
Annual host + support + boundary updates	\$1,200 – \$3,600
Hueneme-style founding package (example)	\$3,500 + \$1,800 = \$5,300

Let’s put Find My School on your site
